January / February (1) 1–105
March / April (2) 107–222
May / June (3) 223–330
July / August (4) 331–430
September / October (5) 431–544
November / December (6) 545–650

SUBJECT INDEX

Aggregation
metastable J-aggregate particles, concentration and temperature-dependent size, cyanine dyes, 585
Amorphous silicon carbide
films, photocurrent multiplication, 192
Analysis
evaporated AgBr layer, structural investigations, 564
mechanism of infectious development, *N'*-acyl-*N*-phenylhydrazines, 281
silver halide crystals, detected species of photosensitive centers, 559
Silver recovery, photographic processing, environmental compliance, 374
Analytical electron microscopy
color fluorescence, cyanine dye aggregates, AgBr emulsion crystals, 348
Analytical methods
correlations between molecular structure, viscoelastic behavior, and fusing properties, styrene-acrylate copolymers as toner resins, 176
electric toner charge, measurement, 480
polarimetry, study of renaturation of collagen fragments, 380
reflectance images, paper surface topography, 504
spectral sensitization, interfacial electronic structure, and adsorption geometry, merocyanine dye/silver halide interfaces, 589
wavelet transform, texture classification, 610
Antifoggant effects
silver halide emulsion layers, stabilization mechanism, triazaindolizine, 524
Apparatus
coating die internals, simplified design, 615
digital image analysis, photographic film test method development, 133
fuser roller, toner release, 462
Kodak ColorEdge CD copier, electrically biased transfer roller performance, 187
photoconductor drum, detection of defect, transparent electrode, 476
Arrhenius test
accelerated image stability testing, limitations, 363
Atomic force microscopy, cubic and octahedral AgBr microcrystals, 344
AgBr crystals, 551
scanning force microscopy, AgBr photographic systems, investigation, 545
Bleach process
studies of mechanism and kinetics, I. simulation on a rotated silver disc, determination of bleach rate, 286
Book reviews
Chemistry & Technology of UV & EB Formulations for Coatings, Inks, & Paints, K. T. Oldring, Ed., vi(1)
Edwin H. Land's Essays: I. Polarizers and Instant Photography; II. Science, Education and Industry; III. Color Vision, 536
Fundamentals of Electronic Imaging Systems, 2nd Ed., W. F. Schreiber, 213
Out of the Shadows: Herschel, Talbot, and the Invention of Photography, Larry J. Schaaf, v(1)
Polymethine Dyes: Structure and Properties, N. Tyutyulkov, J. Fabian, A. Melhorn, F. Dietz, and A. Tadjer, 319
The Application of Statistical Process Control to Roll Products, 2nd Ed., P. J. Frost and E. B. Gutoff, 538
The Focal Encyclopedia of Photography, 3rd Ed., L. Stroebel and R. Zakia, Eds., 641
Carbonless paper
improved fastness of color images, new trimethine leuco dye, 163
Charge agents
I. surface concentration and charging behavior, 431
II. effects of surface concentration on charging and aging, 439
III. thermal properties and triboelectric behavior of trimethylanilinium sulfonates, electrophotographic toners, 446
Charge transfer
carrier injection, from amorphous silicon carbide films, into organic hole transport materials, 399
dipole moment, effect on hole transport, molecularly doped polymers, 245
Chemical sensitization
latent-image and subimage centers, sulfur- and sulfur-plus-gold-sensitized AgBr emulsions, photobleaching study, implications of gold function, 568
silver halide photographic emulsion grain, 319
Coatings
coating die internals, simplified design, 615
Cobalt complexes
Co(III) with dithiooxamide and some derivatives, photographic images, 197
Collagen
renaturation of fragments, polarimetry, 380
Color correction
hard copy from CRT images, new method, 30
Color development
chromogenic photothermography, kinetic study, 598
gelatin layers, kinetics modeling of coupling reactions, 354
kinetics of coupling reactions, solvent dispersion couplers, gelatin layers, 359
Color facsimile
high-quality reproduction, ion flow printing and, application to color facsimile, 37
Color hardcopy
thermal transfer color printing, by laser heat, 235

January / February (1) 1–105
March / April (2) 107–222
May / June (3) 223–330
July / August (4) 331–430
September / October (5) 431–544
November / December (6) 545–650

SUBJECT INDEX

Aggregation
metastable J-aggregate particles, concentration and temperature-dependent size, cyanine dyes, 585
Amorphous silicon carbide
films, photocurrent multiplication, 192
Analysis
evaporated AgBr layer, structural investigations, 564
mechanism of infectious development, *N'*-acyl-*N*-phenylhydrazines, 281
silver halide crystals, detected species of photosensitive centers, 559
Silver recovery, photographic processing, environmental compliance, 374
Analytical electron microscopy
color fluorescence, cyanine dye aggregates, AgBr emulsion crystals, 348
Analytical methods
correlations between molecular structure, viscoelastic behavior, and fusing properties, styrene-acrylate copolymers as toner resins, 176
electric toner charge, measurement, 480
polarimetry, study of renaturation of collagen fragments, 380
reflectance images, paper surface topography, 504
spectral sensitization, interfacial electronic structure, and adsorption geometry, merocyanine dye/silver halide interfaces, 589
wavelet transform, texture classification, 610
Antifoggant effects
silver halide emulsion layers, stabilization mechanism, triazaindolizine, 524
Apparatus
coating die internals, simplified design, 615
digital image analysis, photographic film test method development, 133
fuser roller, toner release, 462
Kodak ColorEdge CD copier, electrically biased transfer roller performance, 187
photoconductor drum, detection of defect, transparent electrode, 476
Arrhenius test
accelerated image stability testing, limitations, 363
Atomic force microscopy, cubic and octahedral AgBr microcrystals, 344
AgBr crystals, 551
scanning force microscopy, AgBr photographic systems, investigation, 545
Bleach process
studies of mechanism and kinetics, I. simulation on a rotated silver disc, determination of bleach rate, 286
Book reviews
Chemistry & Technology of UV & EB Formulations for Coatings, Inks, & Paints, K. T. Oldring, Ed., vi(1)
Edwin H. Land's Essays: I. Polarizers and Instant Photography; II. Science, Education and Industry; III. Color Vision, 536
Fundamentals of Electronic Imaging Systems, 2nd Ed., W. F. Schreiber, 213
Out of the Shadows: Herschel, Talbot, and the Invention of Photography, Larry J. Schaaf, v(1)
Polymethine Dyes: Structure and Properties, N. Tyutyulkov, J. Fabian, A. Melhorn, F. Dietz, and A. Tadjer, 319
The Application of Statistical Process Control to Roll Products, 2nd Ed., P. J. Frost and E. B. Gutoff, 538
The Focal Encyclopedia of Photography, 3rd Ed., L. Stroebel and R. Zakia, Eds., 641
Carbonless paper
improved fastness of color images, new trimethine leuco dye, 163
Charge agents
I. surface concentration and charging behavior, 431
II. effects of surface concentration on charging and aging, 439
III. thermal properties and triboelectric behavior of trimethylanilinium sulfonates, electrophotographic toners, 446
Charge transfer
carrier injection, from amorphous silicon carbide films, into organic hole transport materials, 399
dipole moment, effect on hole transport, molecularly doped polymers, 245
Chemical sensitization
latent-image and subimage centers, sulfur- and sulfur-plus-gold-sensitized AgBr emulsions, photobleaching study, implications of gold function, 568
silver halide photographic emulsion grain, 319
Coatings
coating die internals, simplified design, 615
Cobalt complexes
Co(III) with dithiooxamide and some derivatives, photographic images, 197
Collagen
renaturation of fragments, polarimetry, 380
Color correction
hard copy from CRT images, new method, 30
Color development
chromogenic photothermography, kinetic study, 598
gelatin layers, kinetics modeling of coupling reactions, 354
kinetics of coupling reactions, solvent dispersion couplers, gelatin layers, 359
Color facsimile
high-quality reproduction, ion flow printing and, application to color facsimile, 37
Color hardcopy
thermal transfer color printing, by laser heat, 235

Color images
carbonless paper color images, new trimethine leuco dye, improved fastness, 163
high-speed color imaging, laser ablation transfer with dynamic release layer, fundamental mechanisms, 411
photoactive hexaarylbiimidazoles, 498
Color imaging
laser ablation transfer imaging, picosecond optical pulses, ultrahigh speed, lower threshold, and high resolution, 485
Color printing
finite element dye diffusion thermal transfer method, introduction of partition coefficients, 494
Color processing effluent
simulated C-41 color negative, incineration, laboratory investigation, 97
Color processing effluents
recovery, regeneration, and reuse, limiting factors, 603
Color reproduction
color prediction equation, halftone prints, consideration of paper property, 385
Computer model
continuous ink-jet system, interchannel crosstalk compensation, 171
electrically biased transfer roller performance, Kodak ColorEdge CD copier, 187
Conductivity
ground planes, electrophotographic receptors, 396
Crosstalk
interchannel compensation, continuous ink-jet system, 171
CRT images
color correction in hard copy, new method, 30
Crystal growth
AgBr, number and size as function of addition rate, theoretical and experimental review, 268
effect of gelatin on fine AgBr crystals, double-jet precipitation, 272
renucleation theory and experiments, 510
silver halide tabular crystals, cubo-octahedral side faces, 107
Crystallography
x-form metal-free phthalocyanine, study by Rietveld analysis, 13
Crystal structure
evaporated AgBr layers, structural investigations, 564
photosensitivity and, phthalocyanine pigments, study of relationship, 607
Cyanine dyes
aggregates on AgBr emulsion crystals, study by analytical color fluorescence electron microscopy, 348
metastable J-aggregate particles, concentration and temperature-dependent size, 585
Developers
positive-working photoresist, tetrahydropyranyl groups as acid-labile polymer, relief holograms, 256
Development
infectious, mechanism by *N'*-acyl-*N*-phenylhydrazines, 281
ion flow printing, liquid toner, 405
repeated developer use, dissolution rate of photoresist, 211
theory of non-magnetic contact development, 223
2,7-Diaminofluorenone
bisazo pigments from, design, synthesis, and xerographic properties, 22
Display images
electrographic toner images, partially fixed, 17
Dry silver processes
chromogenic photothermography, kinetic study, 598
Dye stability
accelerated image stability testing, Arrhenius test, limitations, 363
Dye transfer
finite element dye diffusion thermal transfer method, introduction of partition coefficients, 494
printing by laser heat, 167
Effluent treatment
photographic processing solutions, limiting factors of recovery, regeneration, and reuse, 603
Electrochemistry
studies of mechanism and kinetics of bleach process, I. simulation on a rotated silver disc, determination of bleach rate, 286
Electrography
toner release, fuser roller, 462
Electromagnetic radiation
spheroidally shaped particles and, scattering and absorption, computation, 43
Electrophotography
amorphous silicon carbide films, organic hole transport materials, carrier injection into, 399
bisazo compounds, design, synthesis, and xerographic properties, from 2,7-diaminofluorenone, 22
charge agent studies, I. charge agent surface concentration and charging behavior, 431, II. effects of charge agent surface concentration on charging and aging, 439, III. thermal properties and triboelectric behavior of trimethylanilinium sulfonates, electrophotographic toners, 446
electric charge of toner, measurement, 480
electrophotographic receptors, conductivities of ground planes, 396
Kodak ColorEdge CD copier, electrically biased transfer roller, performance, 187
offset quality, 451
partially fixed toner images, application, 17
photoconductor drum, detection of defect, transparent electrode, 476
styrene-acrylate copolymers as toner resins, molecular structure, viscoelastic behavior, and fusing properties, correlations, 176
theory of non-magnetic contact development, 223
toner charging, theory, 1
Electrostatic imaging
ion flow printing, liquid toner image development, 405
photopolymers in, 238
Epitaxy
growth of AgBr films on single crystal surfaces, photochromic properties, 296
Fluids
coating die internals, simplified design, 615
Gelatin
adsorbed on AgBr crystal surface, electron microscope study, 314
collagen fragment, renaturation, polarimetry, 380
effect on agglomeration of fine AgBr crystals, double-jet precipitation, 272
layers, coupling reactions, kinetics modeling, 354, kinetics of coupling reactions, solvent dispersion couplers, 359
Graphic arts
electrostatic imaging, photopolymers in, 238
Halftone color printing
color prediction equation, consideration of paper property, 385
Haze
fused films of encapsulated toner, core-shell refractive index mismatch, models, 5
Holography
positive-working photoresists sensitive to visible light, III. poly(tetrahydropyranyl methacrylates), activation by dye-sensitized decomposition of diphenyliodonium salt, 245
relief holograms, positive-working photoresist, tetrahydropyranyl groups as acid-labile polymer, 256
silver images, photolytically stable bleached, 92
visible laser light photo-induced polymerization, new three-component system, 208
Hydrazines
N'-acyl-*N*-phenylhydrazines, 281, mechanism of infectious development, 281
Image analysis
digital, application to photographic film test method development, 133
wavelet transform, texture classification, 610

Image conservation
paper surface topography, image analysis, reflectance images, 504
Image evaluation
image quality optimization, cascaded electronic document systems, 302
Image quality
estimation of total scattering coefficient, impact on computation of Medium MTF, 129
high definition thermal transfer printing, by laser heat, 231
offset quality electrophotography, 451
optimization, cascaded electronic document systems, 302
theory of non-magnetic contact development, 223
thermal transfer film, running characteristics, printing quality, 490
Image stability
accelerated testing, Arrhenius test, limitations, 363
bleached holographic silver images, 92
carbonless paper color images, new trimethine leuco dye, 163
Infrared imaging
laser ablation transfer with dynamic release layer, high-speed color imaging, fundamental mechanisms, 411
laser ablation transfer, picosecond optical pulses, ultrahigh speed, lower threshold, and high resolution, 485
Ink-jet systems
continuous, interchannel crosstalk compensation in, 171
ink drop, impact on paper, 205
In memoriam
John H. Dessauer, iv(5)
Robert Harding Wood, v(5)
Ion flow printing
high-quality photographic color image reproduction, application to color facsimile, 37
image development, liquid toner, 405
Kinetics
coupling reactions, solvent dispersion couplers, gelatin layers, 359
modeling, coupling reactions, gelatin layers, 354
Laser
very short light pulses, characteristic curves of photographic emulsions after exposure to, 117
Laser ablation imaging
dynamic release layer, high-speed color, fundamental mechanisms, 411
picosecond optical pulses, ultrahigh speed, lower threshold, and high resolution, 485
Laser direct imaging
UV laser-induced polymerization of polyoacrylates, fluorescence probe studies, post-polymerization, 156
visible laser light photo-induced polymerization, new three-component system, 208
Laser heating
high definition thermal transfer printing, 231
thermal transfer color printing and, 235
Laser imaging
dye transfer printing, laser heat, 167
Latent image
characteristic curves of photographic emulsions, exposure to very short laser light pulses, 117
reduction sensitization, role in photographic response, 576
silver halide crystals, detected species of photosensitive centers, 559
silver halide emulsions, electronic properties, 61, quantum clusters of iodide, silver, and silver sulfides, spectroscopic studies, 73, silver cluster formation, probe by picosecond laser spectroscopy, 517
silver halide photographic emulsion, grain, 319
subimage centers and, sulfur- and sulfur-plus-gold-sensitized AgBr emulsions, photobleaching study, implications of gold function, 568
Light scattering
impact of total scattering coefficient, computation of MTF, 129
Light-sensitive materials
new photoimaging system, chlorine-containing polymer, 391
Liquid toners
image development, ion flow printing, 405
Lithography
contrast enhancement system, pyrylium dye bleach chemistry, 149
dissolution rate of photoresist, repeated developer use, 211
Microcapsules
core-shell index, haze from, fused films, refractive index mismatch, 5
Microlithography
contrast enhancement, pyrylium dye bleach chemistry, 149
Microscopy
atomic force studies, AgBr crystals, 551
atomic force study, cubic and octahedral AgBr microcrystals, 344
digital image analysis, application to photographic film test method development, 133
gelatin adsorbed on AgBr crystal surface, electron microscope study, 314
ink drop impact on paper, 205
scanning force, AgBr photographic systems, investigation, 545
Minilabs
C-41 color negative simulated effluent, incineration, laboratory investigation, 97
Modulation transfer function
CRT multiformat printers, imaging characteristics and tone scale calibration, 306
Modulation transfer function (MTF)
computation of, impact of total scattering coefficient, 129
Non-impact printing
color correction in CRT images, new method, 30
ion flow printing, photographic color image reproduction, application to color facsimile, 37
offset quality electrophotography, 451
Nonsilver images
Co(III) complexes, with dithiooxamide and some derivatives, 197
Organic photoconductors
amorphous silicon carbide films, organic hole transport materials, carrier injection into, 399
molecularly doped polymers, dipole moment, effect on hole transport, 245
Paper texture
surface topography, image analysis, reflectance images, 504
Photochromism
properties of AgBr films, epitaxial growth on NaCl single crystal surfaces, 296
Photoconductors
drum, detection of defect, transparent electrode, 476
Photofinishing
C-41 color negative simulated effluent, incineration, laboratory investigation, 97
Photographic emulsions
growth of silver halide tabular crystals, cubo-octahedral side faces, 107
Photographic processing
recovery, regeneration, and reuse of solutions, limiting factors, 603
studies of mechanism and kinetics of bleach process, I. simulation on a rotated silver disc, determination of bleach rate, 286
Photoluminescence
picosecond laser flash spectroscopy, AgI crystals, 261
Photopolymerization
UV laser-induced, fluorescence probe studies, post-polymerization, 156
visible laser light, new three-component system, 208
Photopolymers
in electrostatic imaging, 238
Photoprocessing effluents
silver recovery, environmental compliance, 374

Photoreceptors
molecularly doped polymers, dipole moment, effect on hole transport, 245
photocurrent multiplication, amorphous silicon carbide films, 192
phthalocyanine pigments, crystal structure and photosensitivity, study of relationship, 607
Photoresists
dissolution rate, repeated developer use, 211
positive-working containing tetrahydropyranyl groups, acid-labile polymer, relief holograms, 256
sensitivity to visible light, III. poly(tetrahydropyranyl methacrylates), activation by dye-sensitized decomposition of diphenyliodonium salt, 245
Phototackifiable layers
photoactive hexaarylbiimidazoles, 498
Photothermography
chromogenic, kinetic study, 598
Phthalocyanines
pigments, crystal structure and photosensitivity, study of relationship, 607
x-form metal-free, study of crystal structure, Rietveld analysis, 13
Pigments
azo and intermediates, from 2,7 diaminofluorenone, design, synthesis, and xerographic properties, 22
Polymer imaging
new photoimaging system, chlorine-containing polymer, 391
photoactive hexaarylbiimidazoles, 498
positive-working photoresists sensitive to visible light, III > poly(tetrahydropyranyl methacrylates), activation by dye-sensitized decomposition of diphenyliodonium salt, 245
Printers
cascaded electronic document systems, optimizing image quality, 302
CRT multiformat printers, imaging characteristics and tone scale calibration, 306
Pyrylium dyes
bleach chemistry, contrast enhancement lithography system, 149
Rietveld analysis
crystal structure, x-form metal-free phthalocyanine, 13
Scattering
absorption and, electromagnetic radiation, spheroidally shaped particles, 43
Sensitization
electronic properties, silver bromide emulsions, 61
merocyanine dye/silver halide interfaces, spectral sensitization, interfacial electronic structure, and adsorption geometry, 589
reduction, role in photographic response, 576
silver halide emulsion layers, stabilization mechanism, triazaindolizine, 524
Sensitometry
characteristic curves of photographic emulsions, exposure to very short laser light pulses, 117
Sensors
photocurrent multiplication, amorphous silicon carbide films, 192
Silver bromide
cubic and octahedral microcrystals, atomic force microscopy study, 344
effect of gelatin on fine crystals, double-jet precipitation, 272
photochromic properties of films, epitaxial growth on NaCl single crystal surfaces, 296
photographic systems, scanning force microscopy investigation, 545
Silver halide
growth of tabular crystals, cubo-octahedral side faces, 107
Silver halide emulsions
AgBr emulsion crystals, cyanine dye aggregates on, study by analytical color fluorescence electron microscopy, 348
crystal growth and renucleation, theory and experiments, 510
gelatin adsorbed on AgBr crystal surface, electron microscope study, 314
grain, 331
holographic, photolytically stable bleached, 92
layer stabilization mechanism, triazaindolizine, 524
merocyanine dye interface, spectral sensitization, interfacial electronic structure, and adsorption geometry, 589
number and size of AgBr crystals, function of addition rate, theoretical and experimental review, 268
reduction sensitization, role in photographic response, 576
sensitizer centers, electronic properties, 61
silver cluster formation, probe by picosecond laser spectroscopy, 517
spectroscopic studies, iodide, silver, and silver sulfides, quantum-sized clusters, 73
sulfur- and sulfur-plus-gold-sensitized AgBr emulsions, photobleaching study, implications of gold function, 568
Silver halides
AgBr crystals, atomic force microscopy studies, 551
chromogenic photothermography, kinetic study, 598
crystals, photosensitive centers, detected species, 559
evaporated AgBr layers, structural investigations, 564
Silver iodide
crystals, picosecond laser flash spectroscopy, 261
Silver recovery
photographic processing, environmental compliance, 374
Spectroscopy
picosecond laser, probe of silver cluster formation, silver halide emulsions, 517
picosecond laser flash, AgI crystals, 261
silver bromide emulsions, iodide, silver, and silver sulfide clusters, 73
Spheroidally shaped particles
electromagnetic radiation, scattering and absorption, computation, 43
Stereo imaging
UV laser-induced polymerization of polyolacrylates, fluorescence probe studies, post-polymerization, 156
Substrates
conductivities of ground planes, electrophotographic receptors, 396
ink drop impact on paper, 205
Texture
classification, wavelet transform, 610
Thermal transfer
laser heat, dye transfer printing by, 167
Thermal transfer printing
color, laser heat, 235
finite element dye diffusion method, introduction of partition coefficients, 494
high definition, by laser heat, 231
thermal transfer film, running characteristics, printing quality, 490
Toner charge
charge agent studies, I. charge agent surface concentration and charging behavior, 431, II. effects of charge agent surface concentration on charging and aging, 439
measurement, 480
Toners
charge, theory, 1
electrophotographic, thermal properties and triboelectric behavior of trimethylanilinium sulfonates, 446
encapsulated, haze in fused films of, core-shell refractive index mismatch, 5
partially fixed electrographic images, application, 17
photographic images, Co(III) complexes with dithiooxamide and some derivatives, 197
release from fuser roller, 462
styrene-acrylate copolymers, molecular structure, viscoelastic behavior, and fusing properties, correlations, 176
Tone scale calibration
imaging characteristics and, CRT multiformat printers, 306
Vesicular films
new photoimaging system, chlorine-containing polymer, 391
